## Recipes for the Everyday Life

[Home](#)[Breakfast](#)[Lunch](#)[Dinner](#)[Dessert](#)

### Breakfast

Breakfast is typically the first meal of the day, even though you can eat the food that is normally served in the morning for other meals as well. At breakfast traditionally there are three different types of dishes that are served. There are eggs, meats and different sweet treats that are served. Breakfast is known as the most important meal of the day. Breakfast is known for being important because it should include meat (protein), grains, fruit and vegetables. People state that it is important to include all of these foods to help to get your body started for the day.

We have broken up the categories into different pages and included some recipes that can be easy to follow for the everyday person to create delicious meals.

To have a well rounded and filling meal we recommend you add multiple dishes to create the meal.

Some dishes that may also go well with the ones that we have highlighted as breakfast food are the Fruit Salads. You may also wish to drink orange juice or milk with these dishes.

I created this illustration as a part of the children's book I wrote and illustrated, titled "Dead Dog."

After learning that “Chips Ahoy” was first produced in the 1960’s, I used 60’s fashion to create a package design that could be used as an anniversary release of the cookie. My inspiration for this piece was a dress created by Yves St. Laurent (that was inspired by the work of Piet Mondrian).
